

Mont Blanc Enduro - E Bike

France/Switzerland/Italy

FAQ and Preparation Information

Endless Trails MTB

Email: info@endlesstrailsmtb.com

If you have any questions which aren't covered by this FAQ please do not hesitate to contact us.

Where and when does this trip start and finish?

The **Mont Blanc Enduro** starts and finishes in Chamonix and runs Saturday to Saturday. You need to **arrive in Chamonix on Saturday** and **depart the following Saturday**. We stay in Chamonix on the Saturday you arrive and the following Friday evening. We ride from Sunday morning until Friday afternoon. We'll contact you with the address of our accommodation in Chamonix.

What's included in the Price?

- 7 Nights of Chalet or Hotel Accommodation in shared rooms (Sat-Sun)
- 7 High Quality Evening Meals (Sat-Sun)
- 7 Buffet Breakfasts (Sun-Sat)
- 6 Packed Lunches + Trail Snacks (Sun-Fri)
- 6 Days of Guided Riding (Sun-Fri)
- All necessary lift passes and transport tickets
- E-bike and battery charging in hotels each night
- Van Support - Your kit bag is moved each day and necessary uplifts/transport

What's not included in the Price?

- Transport to and from our start point: Chamonix, France
- Alcoholic and Soft Drinks in the Evenings
- Bike and battery rental (contact Legend CHX in Chamonix if you are looking to rent a bike)

What is the maximum group size?

Our groups are a maximum of 7 riders. This is the largest group booking we can accept and the maximum number of riders on any trip.

Can I book as an individual?

Yes, and many of our customers do just that. By the end of the week you'll be sure to have a bunch of new riding buddies.

Is there an Itinerary?

Our route may change slightly due to weather, forestry, road-closures etc and so we don't publish a detailed itinerary. However, the accommodation is in the following locations and we guarantee we'll take you on a tour of the best possible riding in-between!;

- Chamonix, France,
- Col du Grand St. Bernard, Switzerland/Italy
- Valgrisenche, Aosta Valley, Italy
- Tarentaise Valley, France
- Champagny, France
- Arêches, France
- Chamonix, France

Getting Here

Can I arrive a day or two early and/or leave a day or two late?

This is completely up to you. We can let you know the address of the hotel you will be staying at on your first and last night of the trip and you can contact them to arrange additional nights pre/post trip. Chamonix is very busy in the Summer so this may not always be possible, but we can suggest alternative options if you need.

Which airport should I fly into?

Geneva International Airport is around one hour from Chamonix; this is the best airport to fly to.

What time should I aim to be in Chamonix on the arrival date?

The earliest you can get access to your room at our accommodation in Chamonix is 3pm on Saturday. You are welcome to arrive before this time and it may be possible to build your bikes in the outdoor area and/or leave bags with the hotel staff. We suggest you aim to arrive in Chamonix before around 5pm if at all possible - so if flying please try and aim for a flight that arrives into Geneva before around 3pm. This gives you time to build your bike and relax before we meet at 7.30pm for our evening meal followed by an introductory chat. We will send you more specific arrival instructions before your trip.

How can I get from Geneva airport to Chamonix?

Plenty of operators run a regular scheduled service into Chamonix, and private transfer providers are also plentiful. We recommend Mountain Drop-Offs for regular transfers between Chamonix and Geneva Airport. Please ensure you book your transfer to and from the address we provide by email after booking, which also contains a discount code, if you've not received this and you want to book your transfer please email us.

If you have a very early, or very late flight and want transfers to correspond to those times then your transfer may cost slightly more. Please ensure that you book a bike bag onto the transfer – this may incur a small surcharge.

What is check-out time on the departure date?

Check-out from our final nights' accommodation in Chamonix is 10am on Saturday morning. If you are flying, we would recommend booking a flight that leaves in the early afternoon, this gives you plenty of time in the morning to catch your transfer, but you are also not hanging around needlessly in Chamonix.

Driving Directions:

You can drive to Chamonix easily; we'll provide our accommodation address by email. Please aim to arrive at our accommodation after 15:00 and before around 17:00.

Parking:

There is free parking very near to our accommodation. You are free to leave your car here for the week; we cannot take responsibility for the security of your vehicle - but any problems are rare.

Can I get to Chamonix any other way?

Yes, there is a train station in Chamonix. SNCF is the French National Rail company and their website can help you plan your trip. <https://uk.voyages-sncf.com/en/>

The closest station to our accommodation is actually Les Houches. We will happily come and collect you from here if you are arriving by train and let us know your arrival time in advance.

Can I leave my bike bag in Chamonix?

Yes, our accommodation in Chamonix has storage space to leave your bike bags/boxes for the week.

Admin:

What insurance do I need? **READ THIS!**

You **must** have insurance that will cover you for rescue in a mountainous and backcountry environment in the following countries: France, Switzerland and Italy. Your insurance must also cover you for any medical costs incurred in these countries, as well as repatriation. If you have an EHIC or

GHIC card (EU citizens), this is an easy way of proving you are entitled to reciprocal emergency medical care, however, it does not replace insurance and certainly won't cover any rescue operation. *It is a condition of booking that you take out insurance that meets the above criteria.*

We highly recommend that everyone has travel insurance cover for extra costs and charges incurred as a result of delays, cancellations, rescheduling, repatriation or any factors outside our control.

Should I insure my bike and/or belongings?

We make every effort to ensure the security of your belongings and your bike. However, we don't under any circumstances accept responsibility for damage, loss or theft. It is up to you to ensure that you are happy with the security arrangements in place at the accommodation and whilst transporting belongings, including your bike, on vehicles and other uplifts. We accept no liability for damage incurred to your bike during uplifts, either by vehicle or other mechanical means, our insurance will not cover this. *Please ensure that your belongings and bike are adequately insured during the trip for damage, theft and loss.*

We recommend getting in touch with BIKMO, our partner Insurance company.

Bikmo is cycle insurance, designed and run by cyclists like you. Their award-winning cover provides peace-of-mind protection against theft and accidental damage to your bikes and kit, plus the option to protect yourself as a rider. Whether you commute, race or explore Bikmo provides cover to help you ride more. We've negotiated a 10% discount off your policy for all clients. Get a quote in seconds and redeem your offer at bikmo.com using the discount code ENDLESSTRAILS.

Can I cancel or transfer my space to another week?

Due to the high costs we incur to pre-book accommodation, guiding and transportation, your final payment becomes non-refundable 8 weeks before departure. We highly recommend that you have adequate trip cancellation insurance in place to financially cover non-attendance due to uncontrollable circumstances. Please see our Terms and Conditions of Booking for more information, which are found on the bottom of the booking form.

What happens if I injure myself during the week?

Your insurance policy should cover this eventuality financially. You must be insured for transport to the nearest hospital for treatment. We will help you where we can with logistics in the event of a hospital visit, however, ultimately, our trip will continue without you and you may need to rely on your insurance cover to provide onward transport to either catch up with the trip or for repatriation.

How much spending money should I bring and what currency should this be in?

Euros are used in France and Italy where we spend most of our time and every evening. We don't suggest you should worry about bringing Swiss Francs as in the few places we'll stop in Switzerland you can pay in Euros. You'll just need some money for beer/coffee/soft drinks both en-route and during the evenings. What you bring usually depends on your attitude to wine and beers! We'd suggest that €200 would be more than enough for the week. Most places take cards but you should check with your bank on the fees incurred for foreign transactions - some guests have had a surprise at how large these can be when they've seen their statement when back at home!

When should I tell you about a medical condition?

In the event that you are referred to hospital by our staff we may need to pass on medical information on your behalf. It is therefore extremely important that we are aware of any medical conditions. The booking form you will complete requests this information, however, please ensure that our staff are aware of any medical conditions on the first day of the trip.

The Riding

How long are the days and how much ascending and descending is there?

We'll usually ride from around 9am to around 5pm with a lunch break. During this time we'll often cover up to 50km. There is an average of 1000 metres of climbing each day, with less on some days and slightly more on other days. We'll often descend in excess of 3500 metres during a day. Over the entire week we cover in the saddle, around 275km with 6000m of climbing and 20000m+ of descending.

How difficult is the riding?

You should be a very experienced rider, used to riding natural mountainous singletrack trails with confidence. These can be steep, technical, loose and occasionally exposed. You **do not** need to be comfortable or capable of riding “bike park” style features like jumps or drops – these man-made features are not generally found on our trips. You should be used to handling an EBike in this kind of terrain and the different skills needed for this compared to a normal bike, on both climbs and descents.

How fit do I need to be?

An excellent level of endurance fitness is required. Even though we are on E-bikes the days are demanding and you will cover a lot of ground. You must be prepared to climb for around 1000-1200 metres per day. You must be prepared for long days in the mountains, sometimes with few escape options, and to have the physical fitness and strength to manage the handling of your bike on descents and to assist us in lifting it on/off the uplift trailer.

What kind of trails do you ride?

We ride natural trails that have formed over hundreds of years of farming activity in the European Alps. They are all footpaths and are legal to ride on. It just so happens that these trails are the perfect gradient for mountain biking. They can be steep, loose and technically challenging at times. Check out the video on our website to get an idea. This is NOT a cross-country riding trip, you should feel comfortable on all black-graded trails in the UK and/or natural rocky terrain similar to that found on the bigger Scottish or Lake District mountains.

Do you use lifts or uplifts?

Yes, our concept relies on the use of a combination of lifts and van uplift to help us with the ascending each day. Your lift passes are included in the price of the trip. There will also be some on-bike climbing and occasional points where you may need to push your bike. (yes, even on an ebike!)

What will the weather be like?

Generally through the summer months in the Alps the days are hot and sunny with high pressure systems centred over the Alps for most of the summer. We occasionally get afternoon storms, which while severe are fairly short lived. There is a high temperature range, temperatures can reach 35°C in the valleys during the day, while during a storm it can snow and the temperatures can approach freezing! We can also sometimes experience several days of bad weather due to frontal weather systems, however, these systems are uncommon. It is essential to have appropriate clothing for a range of temperatures and weather conditions. Please read on for advice on the riding kit you should bring on the trip.

Is there a day off? Can I have one?

There is no day off. You are welcome to stay with our van if you do not wish to ride on any day.

Do you use qualified guides?

All our guides are highly experienced, professionally qualified, first aid trained and fully insured.

What do you do to ensure the safety of riders?

We operate in a friendly and relaxed manner - but behind the scenes we are a professional and insured operation, with our head office in the United Kingdom. Our trips are fully risk assessed - have pre-planned bail out options, numerous bad weather alternatives and robust late-home procedures. Our guides carry state of the art satellite tracking equipment.

Kit

What bike do I need?

You need a specific type of bike to ride (and enjoy) this trip. Ideally, we would suggest a modern all-mountain (or enduro) E- bike with around 150-170mm of front and rear suspension. A full E-bike with a 600-750Wh battery is recommended to ensure you have enough battery to get through the days. (45-55km and 1000-1400m climbing) If you have a spare battery or range extender we

recommend you bring it in the van each day and then have the option to change when we meet the van during the day.

Can I bring a fat bike?

No.

Can I bring a 26", 27.5" (650b) or 29" bike?

Yes, we don't care what wheel size you choose as long as it's an appropriate E bike as above.

What tyres should I run?

We personally prefer a tubeless set-up, using Maxxis Assegai or Maxxis Minion tyres. The DD (Double Down) or EXO+ versions of Maxxis tyres have proved to be a great combination between weight, puncture resistance and durability, and are definitely a good idea on heavier E-Bikes. Many people use cush-core or other tyre inserts here too. We always carry at least two tubes with us as tubeless repairs on the move can be time consuming or impossible. You can also run a traditional tubes set-up with any of these tyres. Go for a tyre width between 2.4-2.7". Avoid any skinny cross country tyres and super lightweight tubes, you will not have the comfort, control or puncture resistance that you'll need for this trip. Regardless of your tyre set-up please carry some form of sidewall patch.

What gear set-up shall I use?

Most riders now use a 1x set-up and it works great as it is very simple and requires little maintenance. However, please avoid a huge front ring – a 34t, 32t or 30t all work well. With modern clutch rear derailleurs and narrow-wide rings, front ring chain retention is not usually required. **Bring a spare rear mech hanger.**

Can I use my *insert exotic bike component here*?

We don't really care as long as your set-up is proven and you know how to maintain it.

SPD's or Flats?

This is a personal choice. Some of our guides clip in, others use flats. Our only comment on the subject is to kindly request that you do not arrive with SPD's unless you are 100% comfortable with them in all riding situations. This trip is not the time to learn how to ride with SPD's. If you really are unsure please contact us and we can offer further advice.

Can I hire a bike?

We recommend getting in touch with Legend CHX in Chamonix who hire out excellent quality E bikes which are suitable for this trip. The cost is generally between 500 and 700 Euros per week, and you will need to ensure you can get to the shop on the Saturday you arrive and depart to pick up/return the bike. Unfortunately our schedule with the chalet changeover on Saturdays means we are unable to assist with this.

What tools/workshop spares should I bring alone?

We'll provide a bike stand, track pump and a tool-box (with basic workshop tools) that will be available for use each evening. You should bring any tools that are unique to common servicing of your bike. We'll also provide DOT and Mineral Brake Fluid for bleeding brakes.

What spare parts for my bike should I bring?

Unfortunately with the vast range of different standards in the bike industry now, we can't carry specific spares and therefore **IT IS VERY IMPORTANT** that at the very least you bring, a few sets of replacement brake pads AND a spare derailleur hanger. A spare rear derailleur is a good idea and perhaps a spare tyre in your kit bag. A brake rotor is also something that we commonly see need replacing due to damage or extreme overheating on long descents! We would also recommend any specific bolts that could fail on your bike (shock mount bolts for example). It might take a bit of effort and pre-planning to source some of these spares but this will be worth it if it keeps you on the trail. The areas we pass through are unlikely to have any bike shops that carry stock of the spare parts you need.

What happens if my bike breaks beyond repair?

This is unlucky, but does happen from time to time. We'll do our very best to get you up and running by getting hold of a hire bike for you. More often than not this is not possible though. Unfortunately, we can't be held responsible for any riding you miss as a result of this event, and you should bear this in mind when riding.

What riding kit should I bring? (PLEASE READ THIS SECTION CAREFULLY)

You're riding for 6 days and you're unlikely to have the opportunity to do any laundry. Therefore, please bring enough riding kit for this duration of trip. In good weather, you'll probably only end up using some of it, but in bad weather you'll be thankful of the extra items instead of having to put wet and dirty kit back on in the morning! You'll need riding shorts (we'd say at least 4 pairs) and several short sleeved riding tops (1 for each day ideally). Generally long riding pants will be too hot, however, waterproof over-trousers or waterproof shorts can be brought along if you wish in case of bad weather. Padded chamois undershorts are a good idea especially on the days where there is more pedalling. A good waterproof jacket is essential. It is necessary to bring something to provide some warmth as well – we usually carry a windstopper jersey.

A helmet is required, we generally use a half-lid, but helmets with detachable chin-guards are a good option if you prefer extra protection on the descents. Knee guards are highly recommended and some riders like to use elbow guards too. Riding glasses are essential and you'll definitely want some dark lenses – some riders like to have a clear lens option or photochromic lens. Full finger gloves are recommended, get some lighter ones though, knuckle protection is all very well, but will be hot and uncomfortable. A pair of waterproof or windstopper gloves is nice when the weather is bad. You'll need a 15-20litre pack with the ability to carry at least 2 litres of water. In this pack should be a selection of spares including at least two inner tubes, good tyre levers, a pump, a puncture repair kit, a tyre sidewall repair kit (old cut up toothpaste tubes and duct tape work well), one complete front and rear set of brake pads, a spare derailleur hanger and some common bolts found on your bike. You'll want a selection of trail tools for running adjustments and repairs. We would also suggest including a couple of energy gels.

One of the most important items to bring with you is a mobile phone – reception is surprisingly good in the European Alps and there are situations when a phone call can make life much easier. Please ensure before you depart that your phone will work in Europe. You can keep it turned off if you like, however, please pack it in your riding kit each day. Please also be aware that roaming charges when we are in Switzerland can be very high for some guests, depending on your home country and network provider....definitely worth checking before racking up a huge bill!

Can you list that kit for me?

- Riding Shorts (~4)
- Riding Tops (short sleeved, or at least long sleeved that can be rolled up)
- Chamois Liners (6)
- Good Waterproof Jacket (Goretex or similar)
- Windstopper or Warm Layer
- Waterproof over-trousers/waterproof shorts (no harm in bringing them in case of bad weather)
- A half lid Helmet (full face with detachable chin guard also an option)
- Knee Guards (highly recommended)
- Elbow Guards (optional)
- Riding Glasses (with dark lenses or photochromic lens + clear lenses are optional)
- Full Finger Riding Gloves (we suggest a couple of pairs)
- Bad Weather Riding Gloves
- 15-20litre Riding Pack with a 2/3litre water bladder
- Usual trail spares as discussed above
- Basic trail tools
- Energy Gels
- Mobile Phone
- Camera
- Suncream

What off-bike kit should I bring?

A kit bag, somewhere between 50-100litres should work. Please keep in mind we have limited capacity for kit in our van so keep it to one kit bag per person please. **Please ensure all your spare parts fit in this bag – loose boxes of spares in the van are just asking to get lost.** You'll need clothes for the evenings and some basic items to keep yourself smelling fresh! Towels are provided at all our accommodation. Any questions, fire us an e-mail.

Should I bring any body armour?

As above, we suggest everyone uses knee guards and our guides will nearly always be wearing them for the descents. Some riders feel more comfortable with elbow guards – our guides generally don't use them – however, if you are happy to carry/wear them on the climbs then bring them by all means. We don't suggest a pressure suit or a spine guard, it will be too hot.

Accommodation and Food

What accommodation will we be staying in?

We use a series of comfortable hotels along the route. These are 2*/3*, and we have made sure all the hotels we use are friendly and comfortable. All have hot showers, comfortable beds and somewhere to relax in the evenings. You will always be in either a single or double bed. You will be sharing either a twin or triple room, although we can offer single rooms for a supplement subject to availability.

What about bike/battery charging?

All the hotels we are using have secure bike storage where it is possible to charge E-Bikes overnight. Please bring your own charger and a plug adaptor (suitable for Italian and French style sockets). We have a large extension cable for where we need it. There will also be plug points in your room and if you have a removable battery we ask that you remove it to charge in your room each night. You will be responsible for ensuring you are happy that your bike is charging properly when you leave it for the night.

Is there WiFi?

Yes, although we kindly suggest that you do not use your phone/tablet at the dinner table. Some of the hotels have poor or intermittent WiFi due to their location in the mountains so please do not rely on these connections.

What is the food like?

Each hotel will provide an evening meal and breakfast. The evening meal is a fixed menu affair. This is always a 3/4 course meal. The evening meal does not include wine or any drinks, however, soft and alcoholic drinks can be purchased from the hotel bar. Breakfast is continental style. We provide a packed lunch each day. This will consist of a large sandwich, crisps, a chocolate bar as well as trail mix (dried fruit, sweets) and a selection of fruit.

What happens if I don't like a meal?

If you have any dislikes please specify this on your booking form and we can inform the hotels in advance. The hotel restaurants sometimes offer you a choice of a couple of dishes. They should be able to accommodate minor changes to their menu and will often offer to replace a fixed menu dish with another dish if you don't like the set menu option.

Can you cater to specific dietary requirements?

Usually this is no problem. Please check with us if you have any specific requirements before you book. If you have not entered a specific requirement on your booking form, often the hotel will be unable to cater for this on the evening. If you notify us of an allergy or intolerance, our hotel partners will often go to great lengths to cater for you (France and Italy aren't famous for gluten or dairy free options) – and they don't appreciate it when you change your mind!!

Will there be enough food?

Yes, we have made sure that the hotels we are using will provide "mountain biker" portions and our guests are usually more than happy with the quantity of food. But it is a set meal and the food will not be unlimited. If you have specific calorific requirements, you may feel as though bringing some

extra food is appropriate, for example some guests like to bring along powdered shakes or recovery drinks.

Can I have a room to myself?

Usually we can arrange this, please specify on your booking form. There will be a single room supplement of €40 per night and even if we accept your request there may be situations where we cannot accommodate your single room request on the evening in which case we will refund your supplement. This is sometimes due to the small hotels we use and their room availability at very busy holiday periods.

Do you provide towels?

Yes, there is no need to bring your own towel, each hotel will provide one.

Can I wash my kit at any point during the trip?

No. We strongly advise you to have enough clean riding kit for the entire duration of the trip.
